

The Di´Ana Echo

Keyfacts

- digital Echo
- 2 Presets
- Aluminium case
- Blue DPD Switch

The Di´Ana Echo is a digital echo with the sound of the good old but heavy analog echos. It doesn´t matter if you need short repeats for Rock´n Roll or longer once for soft and creamy leads of a solo. The Di´Ana Echo with its 2 presets gives you all the flexibility you need. For more extraordinary effects use an external potentiometer (pedal) to adjust Repeat 2. The stable but light aluminium case with ist silkscreen print is just right for the use on stage.
